EDUCATION

July 2018 – June 2022

Bharath University · Chennai,

Tamil Nadu,

Bachelor of Technology –

Computer Science and

Engineering.

CERTIFICATIONS

- Angular Developer Course
- Certified Entry-Level Python Programmer
- Full Stack Developer Internship Certificate
- Master Flutter Webinar Certificate

PROFILE

Full Stack Developer with 3 years of experience building scalable, secure web applications using Angular, ASP.NET Core, C#, EF Core, and SQL Server. Proven success in improving API performance by 25%, database efficiency by 30%, and reducing manual effort by 60% through AI integration.

WORK EXPERIENCE

CKS Solutions Nagercoil, Tamil Nadu
Software Developer

JUNE 2023 - PRESENT

- Built scalable full-stack features across 3 production applications serving 300+ concurrent users using Angular, ASP.NET Core 8, and SQL Server, reducing feature release cycles by 20% through reusable components and code standardization.
- Improved API response performance by 25% and database efficiency by 30% through Angular lazy loading, RxJS optimization, LINQ query tuning, and SQL indexing, reducing average page load time from 2.1s to 1.3s.
- Integrated Gemini AI into the Assessgru platform to automate evaluation workflows, reducing manual grading effort by 60% (~18 hours/week) while securing applications with JWT authentication, RBAC, and custom middleware.

INTERNSHIP EXPERIENCE

Digisailor · Thoothukudi, Tamil Nadu
Software Engineer

NOV 2022 – MAY 2023

- Delivered 8+ production full-stack modules using Angular, ASP.NET Core REST APIs, and SQL Server, contributing to a B2C platform processing 1,000+ daily user transactions.
- Managed end-to-end delivery of 15+ sprint stories across requirement analysis, database design, development, and deployment, achieving 90%+ on-time completion within a 6-member Agile team.
- Designed optimized SQL Server schemas using EF Core, LINQ, composite indexing, and stored procedures, achieving sub-300ms query response times for high-throughput data access.
- Implemented JWT authentication and Role-Based Access Control (RBAC) across multiple application modules, strengthening security and supporting access management for 300+ active users.

PROJECTS

Assessgru – AI-Based Assessment Platform

- Architected the full-stack platform using C#, ASP.NET Core 8, EF Core, SOLID Principles, and Repository Pattern — designing MS SQL Server schema, building secure RESTful APIs with Dependency Injection, and developing Angular 20 UI with role-based dashboards for Admin and Candidate modules.
- Integrated Gemini AI to automate test evaluation — eliminating 60% of manual grading effort (~18 hrs/week) — and leveraged RxJS Observables for real-time data updates supporting 300+ concurrent users.
- Achieved 25% API improvement and 30% DB performance gain through LINQ query optimisation, serverside caching, Angular lazy loading, and composite SQL indexing.

Tech Stack: Angular 20, Tailwind CSS, C#, ASP.NET Core 8, Entity Framework Core, LINQ, Gemini AI, REST APIs, Swagger, MS SQL Server

NEET & JEE Exam Preparation Platform (B2C)

- Built the complete full-stack solution — personalised dashboards, course tracking, timed mock tests with real-time exam simulation (auto-submit, timer, analytics), and performance reports — supporting 500+ active student accounts.
- Implemented multi-tenant MS SQL Server database for course management, exam records, and performance data using LINQ with full indexing strategy achieving sub-200ms average query response.
- Designed C# ASP.NET Core 8 REST APIs using SOLID Principles, Dependency Injection, and middleware patterns with JWT authentication, RBAC (Admin/Student roles), lazy loading, and server-side caching for high availability.

Tech Stack: Angular 20, Tailwind CSS, C#, ASP.NET Core 8, Entity Framework Core, LINQ, Gemini AI, REST APIs, Swagger, MS SQL Server

CareerIn – Online Learning Platform

- Developed end-to-end full-stack application — responsive Angular 13 UI with dynamic reactive forms, REST API integration, and full CRUD operations — supporting course enrolments and training records for 200+ registered users.
- Designed the MS SQL Server schema for course catalogues, user enrolments, and training records — implementing stored procedures and LINQ queries for reusable data access patterns with optimised query performance.

Tech Stack: Angular 13, Bootstrap, C#, ASP.NET Core 8, Entity Framework Core, LINQ, REST APIs, Swagger, MS SQL Server

TECHNICAL SKILLS

- **Languages:** C#, TypeScript, JavaScript
- **Frontend:** Angular (v13–20), Angular Signals, Standalone Components, RxJS, HTML5, CSS3, SCSS, Tailwind CSS, Bootstrap, Responsive Web Design, Component-Based Architecture
- **Backend & Real-Time:** ASP.NET Core 8, Entity Framework Core, LINQ, REST API Design, SignalR, JWT Authentication, RBAC.
- **Cloud & DevOps:** Azure App Service, Azure DevOps, GitHub Actions (CI/CD), Git, GitHub
- **AI & Tools:** Gemini AI, GitHub Copilot, ChatGPT, Visual Studio, VS Code
- **Methodology:** Agile, Scrum, SOLID Principles, CI/CD

EDUCATION

Bharath University · Chennai, Tamil Nadu

JULY 2018 – JUNE 2022

Bachelor of Technology – Computer Science and Engineering

CERTIFICATIONS

- **Angular Developer Course** — Core Angular development skills and best practices
- **Certified Entry-Level Python Programmer (PCEP)** — Python Institute
- **Full Stack Developer Internship Certificate** — Digisailor | May 2023
- **Master Flutter Webinar Certificate** — Flutter development and cross-platform mobile UI

DECLARATION

I hereby declare that all the information furnished in this resume is true and correct to the best of my knowledge.
